

PV-KOK2
PV-KOK2

Picture shows PV-KOK2

Advantages

Can also be used for long cableways thanks to the prefixed galvanic isolation.

Transfer rate up to 20,000 bit/s

Supported by standard microcontrollers in industry PCs and mobile devices, therefore making it universally applicable

High signal/power supply ratio for clear signal transmission .

Asynchronous transmission only loads the system when necessary

Sample application

S1: geschlossen, wenn Betriebsstundensignalgeber erreicht
 closed, if min. one channel tripped

S2: offen, wenn Fehler auftritt open, if a fault has occurred

S3: geschlossen, wenn Warnung auftritt closed, if a warning occurs

S4: geschlossen, wenn Uout < Power Good closed, if Uout < Power Good

Approvals
