

All-pole sine filter **SFA 400/10**

Picture shows SFA 400/6

Advantages

Prevention of overvoltages on the motor
Long cable lengths possible
Reduction in motor noise
Minimize of bearing currents
Minimize of leakage currents (is beneficial in the event of incorrect RCD tripping)
Reduction in line-borne and field-borne emitted interference: can be omitted from shielded cables, where necessary
Reduction of motor losses

Applications

Sine filter for the suppression of differential mode interference and common mode interference.

Standards

Output filter with capacitor for frequency converters complying with IEC 61558-2-20, UL 508, CSA 22.2 No. 14-10

Approvals

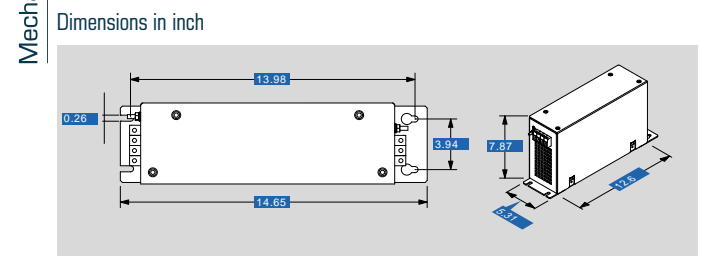

UL 5085-1/-2, CSA 22.2 No.66
