All-pole sine filter **SFA 400/32**

Standards

Output filter with capacitor for frequency converters complying with IEC 61558-2-20, UL 508, CSA 22.2 No. 14-10

- Prevention of overvoltages on the motor
- Long cable lengths possible
- Reduction in motor noise
- Minimize of bearing currents
- Minimize of leakage currents (is beneficial in the event of incorrect RCD tripping)
- Reduction in line-borne and field-borne emitted interference: can be omitted from shielded cables, where necessary $\label{eq:rescaled}$

Reduction of motor losses

Applications

Sine filter for the suppression of differential mode interference and common mode interference.
