## Control- and isolating transformer **STSU 1000/23**

### Standards

Control transformer

to: VDE 0570 Teil 2-2, DIN EN 61558-2-2, EN 61558-2-2, IEC 61558-2-2, UL 5085-1/-2, CSA 22.2 No.66

Isolating transformer

to: VDE 0570 Teil 2-4, DIN EN 61558-2-4, EN 61558-2-4, IEC 61558-2-4, UL 1561, CSA 22.2 No.66

### Advantages

- Dual input voltage 230 and 400 Vac
- Schielding winding between input and output

Reduced inrush current

High power density due to a compact construction design

Primary side ±15 V taps for voltage adjustment

- Very good corrosion protection and low noise due to vacuum impregnation
- Contact protected screw connection terminals complying with UVV BGV A3

Simple mounting due to robust metal footplate with oval slots

DIN rail clamp included 63 - 250 VA

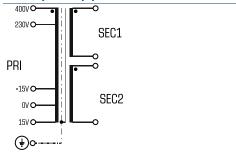

### Applications

As a control transformer for the electrical isolation of the input and output sides. The construction of the transformer to supply control systems according to VDE 0113 is designed.

As an isolating transformer for the safe electrical isolation of the input and output sides. The transformer may be used to set up protective separation as a protective measure in accordance with VDE 0100.

As a safety transformer for the safe electrical isolation of the input and output sides. The transformer is suitable for creating SELV and PELV circuits because of the limit on the output voltage.

### Sample application

Approvals

UL 5085-1/-2, CSA 22.2 No.66
